Moroccan National Health Services (MNHS)

Data Management Course

Mohammed VI Polytechnic University (UM6P)
Professor: Karima Echihabi
Teaching Assistant: Amine Benjelloun
Program: Computer Engineering
Session: Fall 2025

Team Information

Team Name:	Team1 / Section 2
Member 1:	Soukaina EL KESSIRI
Member 2:	Soukaina EL JAOUHARI
Member 3:	Alaa Allah EL BAZZAZ
Member 4:	Mohamed Ziad EL ABBASSI
Member 5:	Youness EL HACHIMI
Member 6:	Oussama EL HILALI
Repository Link:	https://github.com/hash-gdel

Prepared as part of the Data Management Project.

Normalization

- Validate each relation against BCNF.

    1. **Patient:**
       The relation is in BCNF because the determinants `IID` and `CIN` are superkeys.

    2. **ContactLocation:**
       The relation is in BCNF because the determinant `CLID` is a superkey.

    3. **Staff:**
       The relation is in BCNF because the determinant `STAFF_ID` is a superkey.
       N.B: The same applies for the relations in the ISA hierarchy.

    4. **Hospital:**
       The relation is in BCNF because the determinant `HID` is a superkey.

    5. **Department:**
       The relation is in BCNF because the determinants `HID` and `DEPT_ID` are superkeys.

    6. **Insurance:**
       The relation is in BCNF because the determinant `InsId` is a superkey.

    7. **ClinicalActivity:**
       The relation is in BCNF because the determinants `STAFF_ID`, `IID`, `DEPT_ID`, `ExpID`, and `CAID` are superkeys.
       N.B: The same applies for the relations in the ISA hierarchy.

    8. **Expense:**
       The relation is in BCNF because the determinants `ExpID`, `CAID`, and `InsID` are superkeys.

    9. **Prescription:**
       The relation is in BCNF because the determinants `CAID` and `PID` are superkeys.

    10. **Medication:**
        The relation is in BCNF because the determinant `DrugID` is a superkey.

    11. **Stock:**
        The relation is in BCNF because the composed determinant (`HID`, `Drug_ID`, `StockStamp`) is a superkey.

    12. **Prescription-Medication Relationship:**
        The relation is in BCNF because the composed determinant (`Drug_ID`, `PID`) is a superkey.

    13. **Patient-ContactLocation:**
        The relation is in BCNF because the composed determinant (`IID`, `CLID`) is a superkey.

    14. **Patient_Insurance (Covers):**
        The relation is in BCNF because the composed determinant (`IID`, `InsId`) is a superkey.

    15. **Staff_Department:**
        The relation is in BCNF because the composed determinant (`STAFF_ID`, `DEPT_ID`) is a superkey.

- Verify lossless joins and dependency preservation after decomposition.

  Note: All the relations of the schema are in BCNF initially. Hence, no decompositions are needed and consequently, all of the relations are *lossless-join* and *dependency preserving*.

DDL: Schema Creation.

- Create tables for MNHS entities (use exact names and keys from the logical schema):

- Define primary and foreign keys and constraints (NOT NULL, UNIQUE).

```sql
create database lab5 ;
use lab5 ;
CREATE TABLE Patient (
    IID INT PRIMARY KEY,
    CIN VARCHAR(10) UNIQUE NOT NULL,
    FullName VARCHAR(100) NOT NULL,
    Birth DATE,
    Sex ENUM('M', 'F') NOT NULL,
    BloodGroup ENUM('A+','A-','B+','B-','O+','O-','AB+','AB-'),
    Phone VARCHAR(15),
    Email VARCHAR(100)
);

CREATE TABLE Hospital (
    HID INT PRIMARY KEY,
    Name VARCHAR(100) NOT NULL,
    City VARCHAR(50) NOT NULL,
    Region VARCHAR(50)
);

CREATE TABLE Department (
    DEP_ID INT PRIMARY KEY,
    HID INT NOT NULL,
    Name VARCHAR(100) NOT NULL,
    Specialty VARCHAR(100),
    FOREIGN KEY (HID) REFERENCES Hospital(HID)
);

CREATE TABLE Staff (
    STAFF_ID INT PRIMARY KEY,
    FullName VARCHAR(100) NOT NULL,
    Status ENUM('Active','Retired') DEFAULT 'Active'
);

CREATE TABLE Work_in (
    STAFF_ID INT,
    DEP_ID INT,
    PRIMARY KEY (STAFF_ID, DEP_ID),

17. Among patients with at least two emergency visits list those whose latest emergency visit was within the last fourteen days.

```
SELECT CIN, FullName
FROM Patient
WHERE IID IN (
    SELECT IID
    FROM ClinicalActivity
    WHERE CAID IN (
        SELECT CAID
        FROM Emergency
    )
    GROUP BY IID
    HAVING COUNT(CAID) >= 2
    AND DATEDIFF(CURDATE(), MAX(Date)) <= 14
);
```

	CIN	FullName
▶	CIN123	Sara El Amrani

18. For each city rank hospitals by the number of completed appointments in the last ninety days.

```
SELECT H.Name, H.City, COUNT(CA.Date) AS Completed
FROM Hospital H
JOIN Department D ON D.HID = H.HID
JOIN ClinicalActivity CA ON CA.DEP_ID = D.DEP_ID
JOIN Appointment A ON A.CAID = CA.CAID
WHERE A.status = 'Completed'
AND CA.Date >= CURRENT_DATE() - INTERVAL 90 DAY
GROUP BY H.Name, H.City
ORDER BY H.City,   CompletedDESC   ;
```

	Name	City	Completed
▶	Agadir General Hospital	Agadir	3
	Benguerir Central Hospital	Benguerir	5
	Casablanca University Hospital	Casablanca	8
	Fes Regional Hospital	Fes	2
	Rabat Military Hospital	Rabat	1

19. Within each city return medications whose hospital prices show a spread greater than thirty percent between minimum and maximum.

```
SELECT  h.City ,
        m.Name ,
        MIN(s.UnitPrice),
        MAX(s.UnitPrice)
FROM  Stock s
JOIN  Hospital h ON s.HID = h.HID
JOIN  Medication m ON s.MID = m.MID
GROUP BY h.City , m.MID , m.Name
HAVING (MAX(s.UnitPrice) - MIN(s.UnitPrice)) > 0.3 *
    MIN(s.UnitPrice);
```

```
+-----------+-------------+-------------------+-------------------+
| City      | Name        | MIN(s.UnitPrice)  | MAX(s.UnitPrice)  |
+-----------+-------------+-------------------+-------------------+
| Benguerir | Paracetamol |             15.00 |            300.00 |
+-----------+-------------+-------------------+-------------------+
```

20. Data quality check on stock entries list rows with negative quantity or non positive unit price.

```
SELECT *
FROM  Stock
WHERE Qty < 0
    OR UnitPrice <= 0;
```

	HID	MID	StockTimestamp	UnitPrice	Qty	ReorderLevel
